為專業人士而生

pros

符合人體工學、堅守可持續發展理念、性能強勁。

全新一代SwissGrip Evo螺絲起子為工業和手工業內的專業從業者而開發方便他們以精準的動作輕鬆完成大力旋轉操作。

外形符合人體工學的3組手柄將三種精心調製而成的材料成分融為一體。具有減震功能的手柄內芯可保護手部免受機械應力的傷害確保力的傳遞安全順暢。穩固的支撐層與柔軟的防滑包覆層相得益彰在牢固握持的同時可顯著提升扭力哪怕手上有水或沾油也是如此。

功能：

與目前的螺絲起子相比可獲得最大25%的扭力提升

- 通過最優的人體工學設計消除作業帶來的疲勞感
- 耐受性極佳
- 回收成分超過60%秉持可持續發展理念在瑞士製造

## Ergonomical. Durable. Powerful.

SwissGrip Evo is the latest generation of the screwdriver – developed for industry and trade professionals who have to work with precision, comfort and power under the most demanding conditions.

The ergonomically designed three-component handle combines three carefully coordinated material components: The shock-absorbing handle core protects against mechanical stress and provides dependable power transmission. A stable base layer combined with the non-slip, soft-touch surface provides for a secure grip and noticeably more torque – even with wet or oily hands.

## The results:

- up to 25% more torque compared to current screwdrivers
- fatigue-free work due to optimized ergonomics
- a high level of durability
- over 60% recycled material – sustainably produced in Switzerland

一目了然：借助色彩對適用的螺絲桿型號和尺寸進行編碼使使用者可以快速找到正確的工具。

One glance, one reach: You quickly have the right tool in your hand, thanks to the color coding, symbol of the screw and the size.

### Maximum power transmission with 25% more torque

Thanks to the innovative three-component materials and the modified round design, the force exerted by the user's hand is transferred to the screw more efficiently than ever before. 25% more torque compared to the proven SwissGrip line (\*based on user tests).

## 全新的手柄結構 structure

SwissGripEvo是選材理念、生態責任和瑞士品質三者融為一體的產品。微球增強型內芯由可回收成分制成在追求性能極致的同時對精度要求毫不妥協讓工具承載的精湛技藝代代相傳。

The SwissGrip Evo features a winning material concept that combines environmental responsibility with Swiss quality. The microsphere-reinforced inner core made of recycled components offers maximum performance and uncompromising precision – for tools that last for generations.

①

### 把握可持續發展核心理念。

第一層內芯：具有獨特微觀結構的防震內芯採用可回收材料打造而成韌性高且可實現最佳力傳遞。

### Sustainability in the palm of your hand.

The first core: A shock-absorbing inner core with a microstructure of recycled material offers toughness and optimal power transmission.

**# tide**  
OCEAN MATERIAL

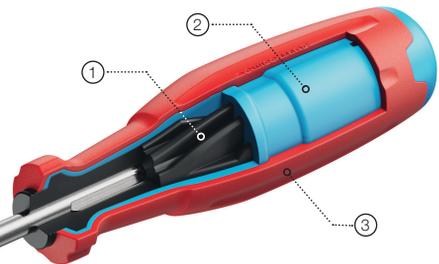

②

### 最強抵抗力、性能持久。

第二層內芯更硬其透過稜紋結構與第一層緊咬合在一起。兩者深度嵌合滿足對手柄的多元化需求。

### Maximum robustness. Durable performance.

The second, harder core is tightly interlocked with the first by means of a rib structure. The two components thus mesh together to master all the demands placed on the handle with ease.

③

### 握持更牢固、使用更安全、設計更巧妙。

柔軟的防滑包覆層為每一次的旋轉動作帶來最大握持力。無論是單手操作還是在苛刻的環境條件下使用都是精準作業的不二之選。

SwissGrip Evo能夠耐受礦物油、脂類和機械應力非常適合應對車間繁重的日常工作。

### Grippier. Safer. Smarter.

The non-slip, soft-touch surface provides maximum grip for every motion. Perfect for precision tasks – even when working one-handed or in tough spots.

The SwissGrip Evo is resistant to mineral oils, greases and mechanical stress – making it ideal for tough everyday use in the shop.
